CMO

Simple. Intuitive. Site-Ready.

Build a safer, better-regulated working environment with **EHS & GRC** applications that are easy to deploy, adapt and use
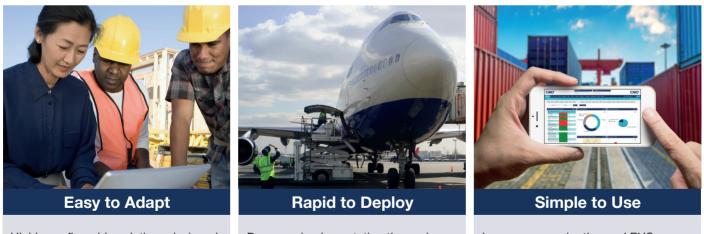

Let's Build a Safer World

Our software solutions make it easy for you to manage environmental, health & safety risks and to stay ahead of complex organizational, regulatory and audit compliance requirements.

We've made our multi-lingual EHS and GRC applications simple, intuitive and accessible anywhere – so your employees will want to use them, no matter where they are.

You'll also be up and running in no time with pre-configured, best practice solutions to accelerate your deployment. And with our configurable form builder and flexible workflow engine, you're empowered to extend and adapt your solution to help you keep pace with rapid change.

Easy to Adapt

Highly configurable solutions designed to integrate with current processes and expand to meet future business needs

Rapid to Deploy

Decrease implementation time using our best practice solutions and proven implementation methodologies to accelerate compliance.

Simple to Use

Improve user adoption and EHS outcomes with a highly-intuitive interface, advanced configuration options and mobile platforms.

CMO

Training and Competence

Our EHS & GRC Applications

Audit & Assessment
Manage internal, external and third party audits to remain compliant and avoid penalties.

Compliance Management
Automate the tracking of responsibilities and due dates for compliance obligations.

Environmental Management
Control environmental impact and remain compliant using an Environmental Management System.

Health & Safety
Continuously measure and analyze high risk workplaces to minimise risk to employees and others.

Incident Management
Maintain ongoing operations by managing the implications of critical incidents.

Risk Management
Efficiently manage operational risk to maximize organisational performance within acceptable risk levels.

Third Party Management
Ensure that contractors and suppliers maintain the high standards of compliance expected.

Training & Competence
Manage skill levels and provide scheduled e-learning training courses and assessments for employees.

The Power of our Platform

Our flexible and simple-to-use workflow engine puts you in control. You can automate new processes, make changes easily, and our powerful analytics engine will help you drive continual improvement.

Automate	Adapt	Build	Measure	Connect
Streamline and automate new and existing EHS and GRC processes to embrace best practices, and drive more robust and repeatable outcomes.	Respond to regulatory and operational change faster and adapt your applications and processes without coding and scripting.	Create new applications and workflows to build a more comprehensive and integrated solution, while getting more from your investment in CMO.	Get real insights from your EHS and GRC data, to make informed, evidence-based decisions and drive continual improvement through operational excellence.	Keep everyone connected and up to speed with ongoing developments and issues with proactive alerts and shared updates.
